ABOUT THE EURINT CONFERENCE SERIES

The EURINT conference series was launched by the Centre for European Studies in 2013 in the frame of the Jean Monnet Life Long Learning Programme. Since 2013 the EURINT conference has established itself as one of the most visible academic events in field of European Studies from Central and Eastern Europe and in this regard, we are pleased to have managed to develop it into a traditional conference series. The EURINT conference package addresses those who show a genuine interest in enhancing their research skills in European Studies and in contributing to developing a transnational network of contacts and cooperation focusing on Central and Eastern Europe. The EURINT Conference series usually comprise keynote lectures and panel debates involving international academic experts, followed by intensive Q&A sessions. The audience is strongly encouraged to take the floor and challenge speakers with their own views and reflections of the topic and, thus, add to the debate. The academic programme also includes parallel academic sessions during which the conference participants (researchers, students, young professionals, etc.) are expected to deliver presentations of their most recent research. Thanks to a strong international presence, presented papers will benefit from invaluable discussion and feedback. Iasi is one of the easternmost cities of the European Union, a very important academic centre for Romania and also a cradle of Romanian history and culture. Our city could not only serve as a bridge between the West and East, but also as a starting point for developing stronger connections between our country, the European Union and our Eastern European friends from the neighbourhood.

THE EURINT 2020 CONFERENCE RATIONALE

EURINT 2020 | EU and its neighbourhood: enhancing EU actorness in the eastern borderlands will, first, seek to bring additional insights into the way the EU policies are being framed and adapted in order to hamper the imbalances at the level of the borderlands between the EU and non-EU states in Eastern Europe. Second, it will assess the implication of the neighbourhood instruments in the borderland regions and try to provide answers about level of attractiveness the EU's specific policies and instruments. Since the EU's essential values such as good governance, democracy, economic prosperity and security have been constantly under pressure in the past years in the Eastern neighbourhood of the EU, it is interesting to gauge whether the EU can be still regarded as a source of political and economic support for the countries in the region. Last but not least, the conference will offer the possibility to

discuss ways of improving the effectiveness of the neighbourhood instruments in relation to its Eastern Partnership countries and debate whether the current design of these instruments is still suitable for a significantly altered region marked by the current geopolitical tensions between the Euro-Atlantic community and Russia.

EURINT 2020 will have a strong academic interdisciplinary character (political, economic, social, etc.) when assessing the EU's policies in the region (such as, the European Neighbourhood Policy and the Eastern Partnership) and, more specifically, the impact of the neighbourhood instruments (i.e. the European Neighbouring Instrument, Cross-Border-Cooperation, Euroregions, bilateral state partnerships, etc.).

The Centre for European Studies in cooperation Jean Monnet European Documentation Centre organizes an international academic event which addresses those who show a genuine interest in enhancing their research skills in European studies and in contributing to developing a transnational network of contacts and cooperation.

During the two-day conference, an exciting academic programme, featuring renowned international experts and keynote lectures, will be offered to our participants: PhD candidates, post-doc fellows, researchers, civil society activists, NGO representatives, consultants, policy advocates and many more.
