ABOUT THE EURINT CONFERENCE SERIES

The EURINT conference series was launched by the Centre for European Studies, in 2013, in the frame of the Jean Monnet Life Long Learning Programme. Since 2013, the EURINT conference has established itself as a visible academic event in the field of European Studies and in this regard, we are pleased to develop it into a traditional conference series. The EURINT conference addresses those who show a genuine interest in enhancing a transnational research network. It usually comprises keynote lectures and panel debates involving international academic experts, followed by intensive Q&A sessions. The audience is strongly encouraged to take the floor and challenge speakers with their own views and reflections on the topics. The programme also includes parallel sessions during which the conference participants (researchers, students, young professionals, etc.) are expected to deliver presentations of their most recent research.

The Centre for European Studies is located in Iași, Romania, which is one of the easternmost cities of the European Union, a very important academic centre in our country and also a cradle of Romanian history and culture. Our city could not only serve as a bridge between the West and East, but also as a starting point for developing stronger connections between our country, the European Union and our Eastern European friends from the neighbourhood.

THE EURINT 2024 CONFERENCE RATIONALE

Crises affect people and the societies in which they live. Thus, in the light of the current multidimensional challenges at the European Union level, there is a need to expand the debates about finding solutions to combat crises, in order to generate a more inclusive, sustainable and resilient Union. Strengthening the resilience capacity of European economies depends on the ability of governments to respond to different types of shocks through appropriate policies, adapted to the context. Answers to crises are found more easily through discussions at all levels (multi-level approach), involving both the representatives of decision-making institutions and civil society.

By organising this conference, the aim is to create a favourable framework for dialogue and analysis on the issues facing the European Union, as well as other relevant related topics. The event is addressed to all those interested in the broad spectrum of aspects that the European Union incorporates.
